

Execute

Improve E-commerce Economics

By transforming cross-docking and driver operations

PRODUCT BROCHURE

Enterprises struggle with delivery volumes and on-time deliveries due to high order volumes and inefficient operations at the cross-dock. Fluctuations in order volumes and expectations of faster free deliveries only adds to logistics complexity. In addition to customer loyalty and employee fatigue, this directly affects delivery operational costs and impacts profitability. Streamlining day-to-day operations for drivers and at the cross-dock is critical to keep things running smoothly.

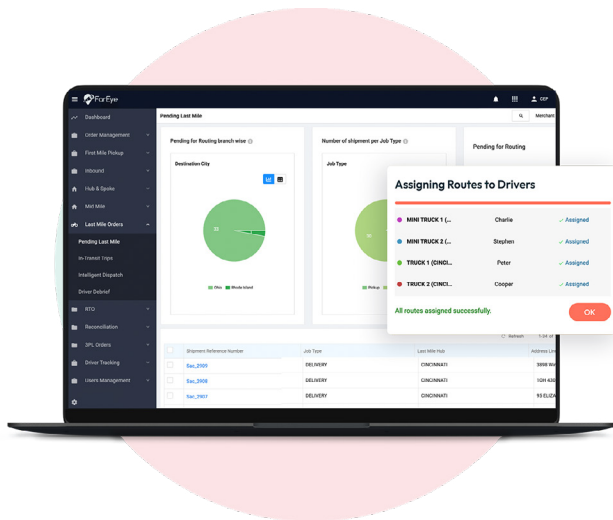

Challenges

- ✓ Eliminate delivery errors by streamlining dispatching
- ✓ Reduce time spent on manual routing operations
- ✓ Provide customers with multiple options and delivery windows
- ✓ Deliver the right orders to the right customers at the right time
- ✓ Ensure driver working hours are effectively utilized
- ✓ Deliver on-time even in areas where addresses are not standardized

FarEye Execute

Expedite your dispatch process with FarEye Execute and improve e-commerce economics significantly. Easily manage high order volumes by transforming cross-dock operations including scanning, sorting and consolidation of orders. Choose the right carrier by factoring in different parameters including serviceability, fleet size, delivery and volume through automated carrier selection. Automate and manage a wide range of driver operations from onboarding to order management through a customizable mobile app.

Execute Modules

Cross-dock

Organize your cross-dock operations which includes scanning and sorting through FarEye's web and mobile applications. Reduce order processing time and handle large order volumes with ease.

Drive

Empower your drivers with an intuitive and powerful mobile app through which you can onboard, manage and control job allocation, routing, delivery sequence and also facilitate real-time communication with customers.

Rate

Manage carrier operations by maintaining standard or custom rates in one place and automatic calculations of all freight charges for various modes of transportation based on the business logic such as lead time, cost, and latest rate.

First Choice for Last Mile
